Rohit Biswas

US Citizen | rb3908@columbia.edu | rohitbiswas.com | linkedin.com/in/rohitbiswas3/ | github.com/Biswasrohit

Education

Columbia University — Expected May 2027
Bachelor of Science in Computer Science — *GPA: 3.81*
Bachelor of Science in Engineering Physics (Dual-Degree)
Coursework: Data Structures & Algorithms, Operating Systems, Databases, AI, NLP

Experience

Mutual of Omaha — Jun 2026 – Aug 2026
Incoming Software Engineer Intern — *Omaha, NE*

Application Development Initiative (ADI) — Feb 2026 – Present
Software Developer, DevFest Platform Team — *New York, NY*

- Shipped team formation, submission, and judging features in React/Node.js for the DevFest platform serving 500+ participants
- Implemented WebSocket-based live scoring pipeline that replaced manual tabulation with real-time leaderboard updates
- Configured CI checks in GitHub Actions with Jest integration and unit tests to catch regressions before merging PRs

Columbia Technology Ventures — Oct 2025 – Present
Systems Engineer — *New York, NY*

- Designed idempotent deployment pipeline in Python/Bash/PowerShell with automated rollback, cutting setup time by 40%
- Architected event-driven monitoring service processing 500+ daily events with REST API alerts, reducing response time by 60%
- Developed internal CLI tools automating Active Directory provisioning and OneDrive sync, onboarding 30+ staff per semester

New York City Housing Authority — Jun 2025 – Aug 2025
Cybersecurity Intern — *New York, NY*

- Created reusable SPL query library for Splunk ES standardizing triage across 20+ incident types, cutting investigation time by 40%
- Deployed Veracode DAST pipeline across 50+ web apps that reduced open vulnerability findings by 30% in 6 weeks
- Authored incident response runbooks and trained analysts on the new SPL library, adopted as standard triage tooling

Fordham University — May 2023 – Jun 2025
IT Engineer — *Bronx, NY*

- Engineered Python/Shell automation for enterprise software deployment across 200+ workstations, cutting deploy time by 70%
- Integrated Crowdstrike, LANDESK, and PowerFAIDS via REST APIs and containerized microservices for real-time data sync

Projects

ContractPilot | *DevFest 2026 Winner, YC Interview* | Next.js, Python, FastAPI, Convex — GitHub

- Built AI legal doc reviewer: OCR extraction (Tesseract), 6 parallel AI workers, plain-English risk scores, interactive PDF viewer
- Full-stack: Next.js + Convex real-time streaming, FastAPI orchestration, Dedalus ADK agentic pipeline, RAG over 21K+ clauses
- Shipped credit paywall, Google OAuth, PDF report generation, and color-coded clause review with hover analysis and click-to-chat
- Led 4-person team in a 36-hour sprint; received Y Combinator interview on product vision and technical architecture

Stemme.Study | *MLH Award Winner* | React, Node.js, Express, WebSockets — Devpost | GitHub

- Developed real-time speech therapy app with React/Express and bidirectional WebSocket streaming at sub-500ms latency
- Integrated ElevenLabs TTS with response caching and batched API calls to keep round-trip under 500ms

AutoDump | *3rd Place, MakeCU* | Raspberry Pi, OpenCV, Python, C++, Arduino — Devpost | GitHub

- Constructed autonomous rover with OpenCV ArUco marker docking (±2cm accuracy) and ultrasonic obstacle avoidance
- Implemented Python state machine controlling servo dump mechanism via Arduino/ROBOTIS serial for full autonomous operation

PageRank Visualizer | React, TypeScript, React Flow, Framer Motion — Live | GitHub

- Built interactive graph editor with real-time power iteration, adjustable damping factor, and step-through animation controls
- Visualizes PageRank, in-degree, and eigenvector centrality side-by-side with live Google Matrix and convergence metrics

HTTP/1.0 Web Server | C, POSIX Sockets, HTTP/1.0 — GitHub

- Built multithreaded C server with concurrent connections, MIME routing, path traversal protection, and connection pooling

Awards

DevFest 2026 – Best Use of Flowglad, Y Combinator Interview | DivHacks 2025 – MLH Award | MakeCU 2025 – 3rd Place

Technical Skills

Languages: Java, Python, JavaScript/TypeScript, C, C++, SQL, HTML/CSS, Bash, PowerShell
Frameworks & APIs: React, Next.js, Node.js, Express, FastAPI, Flask, REST APIs, WebSockets
Infrastructure: Linux/UNIX, Docker, Kubernetes, Git, CI/CD, PostgreSQL, Splunk, Microservices
Tools & Domains: OpenCV, Arduino, Raspberry Pi, System Design, Distributed Systems
